

# "Simplicity in Trade"

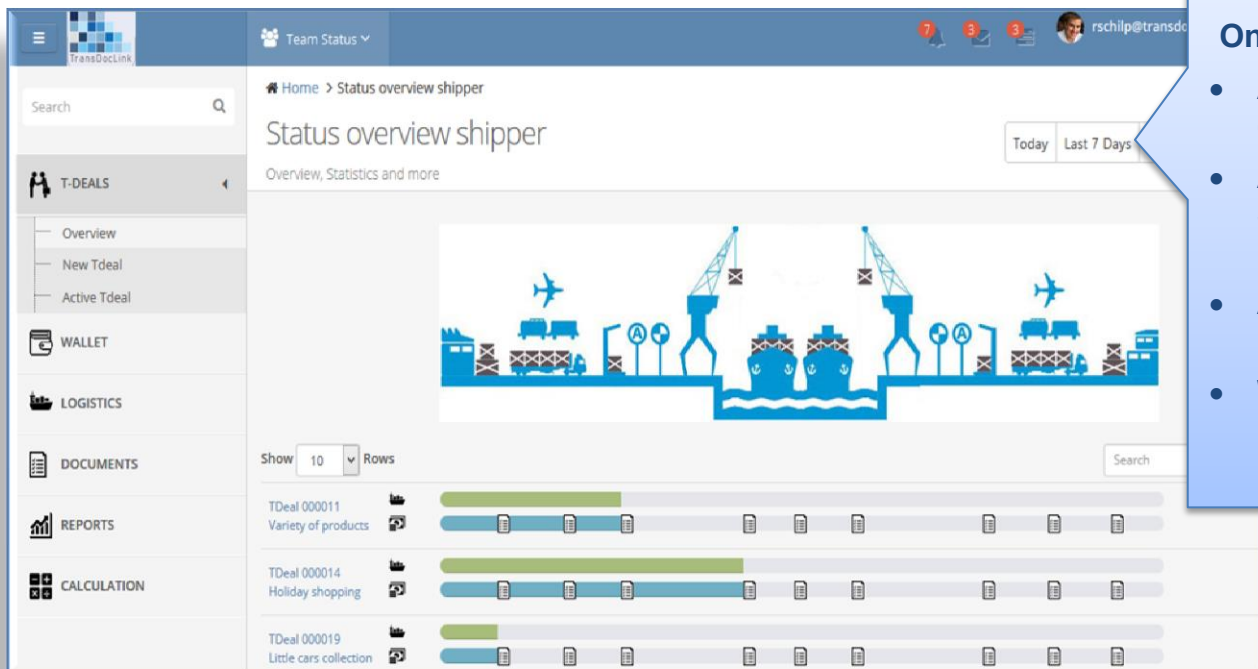

As in- or export company, you want to know the details of manufacturing timelines, shipment conditions and have insight on payable & receivable of funds. Having access to near real-time information and knowledge on what's happening with cargo, payments, customs anywhere around the world, means having control over your business. TransDocLink is your partner in getting control over your full supply chain, which eases the struggle to get the goods in time, on the right place with the right quality with no worries if payments are due

## Trade finance market dynamics

The market place of trade finance has not evolved as rapidly as other industries, especially ecommerce related industries. A trend is recognised that more producing companies directly sell & market their products and smaller companies are looking abroad for alternative sourcing options to buy products. TransDocLink focusses on enabling ecommerce by servicing both the logistics as well as the financial settlement related to trade transactions.

**TDL delivers on-line document handling & financial settlement in trade for small & medium enterprises, providing transparency, cost efficiency & risk minimalisation**

The import company (Buyer) is linked directly to the export company (Seller) supporting both the financial supply chain as well as the document flows/exchange and logistical settlement. The value chain is transparent for all involved parties (customs, import and export company, tax agencies etc.) creating ease of use, speed & safety. TransDocLink provides u with a modern, cost-effective alternative for settling trade & making well balanced risk reward trade-offs!

### One platform to:
